Hygiene System

Initiator(s)

N55

Description

The Hygiene System is a unit to satisfy the minimum needs for personal hygiene. The unit consists of three parts: a toilet module, a module for bathing, and a supply module. It's easy to build, install, and everybody can use it. The design is simple, compact and it can be constructed with minimal means. At the same time, the Hygiene System is easy to clean and durable. A DIY manual for constructing a hygiene unit is available online.

Goals

To be an accessible, mobile hygiene unit to be used anywhere.

Beneficial outcomes

Everyone can build the Hygiene system using a free manual that is available on the website.
